Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 July 2002.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed July 10, 2002 in which Claims 1, 9 and 16 have been amended, has been placed of record in the file as Paper No. 12.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kimura (U.S. Patent No. 6,102,708) in view of Przilas et al. (U.S. Patent No. 6,139,361). With regard to Claims 1-3, 9, and 16-17, Kimura discloses an electrical connector system comprising: an electronic card connector (1) having an opening, between (81) and (91); a frame (12) associated with the electrical connector (1) and a transition board (260). See Figs. 2-5.

Kimura doesn't show a temperature sensor positioned to detect a temperature of a mating connector and positioned to allow insertion and removal of the mating connector from the electrical connector.

Art Unit: 2833

Przilas et al. discloses an electrical connector (100) having a temperature sensor (116) positioned to detect a temperature of a mating connector (32) and positioned to allow insertion and removal of the mating connector (32) from the electrical connector (100). See Fig. 3A.

Thus, it would have been obvious to one with ordinary skill in the art to modify the electrical connector system of Kimura by including a temperature sensor positioned to detect a temperature of a mating connector and positioned to allow insertion and removal of the mating connector from the electrical connector as taught in Przilas et al. to detect overload and to shut down the system when overload takes place.

With regard to Claims 4-7, and 10-13, Kimura discloses the electronic card connector (1) includes a conductive cover (81,91) having an aperture, (below (86)), the cover includes a tab (86) associated with the aperture (below (86)); and further comprising an eject mechanism (351). See Fig. 1.

4. Claims 8, 14-15 and 18-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kimura (U.S. Patent No. 6,102,708) in view of Przilas et al. (U.S. Patent No. 6,139,361) and Cohn et al. (U.S. Patent No. 4,915,639). The combination of Kimura and Przilas et al. discloses the claimed invention except for the temperature sensor mounted to a flexible circuit.

Cohn et al. discloses a flexible circuit (72), the temperature sensor (70) mounted to a flexible circuit (72). See Fig. 6.

Thus, it would have been obvious to one with ordinary skill in the art to modify the electrical connector system of Kimura and Przilas et al. by including the temperature

Art Unit: 2833

sensor mounted to a flexible circuit as taught in Cohn et al. to make the sensor easy to move inside the system in order to detect temperature of different sizes of mating connectors.

Response to Arguments

4. Applicant's arguments with respect to claims 1-19 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2833

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edwin A. León whose telephone number is (703) 308-6253. The examiner can normally be reached on Monday - Friday 10:00-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula A. Bradley can be reached on (703) 308-2319. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7722 for regular communications and (703) 308-7722 for After Final communications.
